

Project: OrderFlow Nexus – Order & Vendor Coordination System (agile)
Key Functionalities

1 Order Lifecycle Management

Tracks orders from placement to final delivery, ensuring smooth processing and monitoring of all orders.

2 Vendor & Client Coordination Module

Aligns timelines between clients and procurement vendors to ensure on-time order fulfillment.

3 Issue Resolution & Escalation Handling

Identifies and resolves order-related issues using Root Cause Analysis (RCA) to prevent recurring problems.

4 Vendor Assignment Optimization

Analyzes print techniques and vendor capabilities to assign the most suitable vendor for each order.

5 Delivery Accuracy Monitoring

Tracks delivery performance and helps reduce delivery errors through process improvements.

6 Customer Satisfaction Tracking

Measures client feedback and satisfaction score (CSAT) to ensure service quality.

7 Performance Dashboard (KRA & KPI)

Monitors order completion rate, delivery accuracy, issue resolution time, and vendor performance.

8 Ad-hoc Operations Support

Handles urgent operational requests and special projects to maintain workflow continuity.

Action Plan:

At first implement 4-5 features.
